## Long-Term Follow-Up Guidelines

for Survivors of Childhood, Adolescent,  
and Young Adult Cancers  
Version 2.0 – March 2006

## Reference Materials

## Abbreviations

Abbreviation	Definition
AAP-CIDP	American Academy of Pediatrics Committee on Infectious Disease Prevention
ABR	Brainstem auditory evoked responses
AFP	Alpha fetoprotein
ACS	American Cancer Society
AHA	American Heart Association
ALT	Alanine aminotransferase
AST	Aspartate aminotransferase
ATM	Ataxia telangiectasia cancer susceptibility gene located on chromosome 11
AVN	Avascular necrosis
BAER	Brainstem auditory evoked responses
BCNU	Carmustine
BMD	Bone mineral density
BMI	Body mass index
BRCA1	Breast cancer, early onset gene (cancer susceptibility gene located on chromosome 17)
BRCA2	Breast cancer 2, early onset gene (cancer susceptibility gene located on chromosome 13)
BUN	Blood urea nitrogen
Ca	Calcium
CBC	Complete blood count
CCG	Children's Cancer Group
CCNU	Lomustine
CD-4	Cluster of differentiation antigen associated with helper T lymphocyte
CDC	Centers for Disease Control
cGVHD	Chronic graft versus host disease
Cl	Chloride
CNS	Central nervous system
CO <sub>2</sub>	Carbon dioxide
COG	Children's Oncology Group
CSF	Cerebral spinal fluid
CT	Computed tomography
CXR	Chest radiograph
DES	Diethylstilbestrol
DEXA	Dual energy x-ray absorptiometry
DLCO	Diffusion capacity of carbon monoxide
DOE	Dyspnea on exertion
EBMT	European Group for Blood and Marrow Transplant
ECHO	Echocardiogram
EKG	Electrocardiogram
EIA	Enzyme immunoassay
FAP	Familial adenomatous polyposis
FNA	Fine needle aspirate
FSH	Follicle stimulating hormone
GH	Growth hormone
GVHD	Graft versus host disease
Gy	Gray
HBcAb	Hepatitis B core antibody
HBsAg	Hepatitis B surface antigen
HCT	Hematopoietic cell transplant
HCV	Hepatitis C virus
HDL	High-density lipoproteins
HIB	<i>Haemophilus influenza B</i>
HIV	Human immunodeficiency virus

## Abbreviations (cont)

Abbreviation	Definition
HNPPCC	Hereditary nonpolyposis colorectal cancer
HPF	High power field
HPV	Human papilloma virus
HRT	Hormonal replacement therapy
Hz	Hertz
IBD	Inflammatory bowel disease
K	Potassium
I-131	Iodine 131 radioisotope
IQ	Intelligence quotient
IT	Intrathecal
IV	Intravenous
IVIG	Intravenous immunoglobulin
KUB	Kidneys, ureters, bladder radiograph
LH	Luteinizing hormone
MIBG	Iodine-131-meta-iodobenzylguanidine
Mg	Magnesium
MOPP	Mechlorethamine, Oncovin, Procarbazine, Prednisone
MRI	Magnetic resonance imaging
MUGA	Multiple Gated Acquisition scan
Na	Sodium
NCEP	National Cholesterol Education Program
NCHS	National Center for Health Statistics
NF1	Neurofibromin 1 (neurofibromatosis) cancer susceptibility gene located on chromosome 17
NSAIDs	Non-steroidal anti-inflammatory drugs
OAE	Otoacoustic emissions
OCP	Oral contraceptive pills
PAP	Papanicoulau
PCR	Polymerase chain reaction
PFTs	Pulmonary function tests
p53	Cancer susceptibility gene located on chromosome 17 associated with familial cancers
PO	By mouth
PO <sub>4</sub>	Phosphate
PRN	As needed
PSA	Prostate specific antigen
QCT	Quantitative computed tomography
QTc	Corrected QT interval
RB1	Retinoblastoma gene – cancer susceptibility gene located on chromosome 13
RBC	Red blood cell
RDA	Recommended daily allowance
RUQ	Right upper quadrant
SCUBA	Self-contained underwater breathing apparatus
SD	Standard deviation
SOB	Shortness of breath
T <sub>4</sub>	Thyroxine
TBI	Total body irradiation
TPN	Total parenteral nutrition
TSH	Thyroid stimulating hormone
U/A	Urinalysis
USPSTF	United States Preventive Services Task Force
VOD	Veno-occlusive disease
VZIG	Varicella zoster immunoglobulin

# Chemotherapy Agents

Generic Name	Additional Name(s)	Classification
Asparaginase	Elspar®	Enzyme
	Erwinia asparaginase	
	Kidrolase®	
	L-asparaginase	
	Oncaspar®	
	PEG-asparaginase	
Bleomycin	Blenoxane®	Anti-tumor antibiotic
Busulfan	Busulfex®	Alkylating agent
	Busulphan	
	Myleran®	
Carboplatin	CBDCA	Heavy metal
	Paraplatin®	
Carmustine	BCNU	Alkylating agent
	BiCNU®	
Chlorambucil	Leukeran®	Alkylating agent
Cisplatin	CDDP	Heavy metal
	Cisplatinum	
	Platinol®	
Cyclophosphamide	CPM	Alkylating agent
	Cytoxan®	
	Neosar®	
	Procytox®	
Cytarabine	Ara-C	Antimetabolite
	Cytosar®	
	Cytosar-U®	
	Cytosine arabinoside	
Dacarbazine	DTIC	Non-classical alkylator
	DTIC-Dome®	
Dactinomycin	Actinomycin-D	Anti-tumor antibiotic
	Cosmegen®	
Daunorubicin	Cerubidine®	Anthracycline antibiotic
	Daunomycin	
	DaunoXome®	
Dexamethasone	Decadron®	Corticosteroid
Doxorubicin	Adriamycin®	Anthracycline antibiotic
	Doxil®	
	Rubex®	
Epirubicin	Ellence®	Anthracycline antibiotic
	Pharmorubicin PFS®	

## Chemotherapy Agents (cont)

Generic Name	Additional Name(s)	Classification
Etoposide	VePesid®	Epipodophyllotoxin
	VP-16	
Idarubicin	Idamycin®	Anthracycline antibiotic
Ifosfamide	Ifex®	Alkylating agent
Lomustine	CeeNU®	Alkylating agent
	CCNU	
Mechlorethamine	Mustargen®	Alkylating agent
	Nitrogen Mustard	
Melphalan	Alkeran®	Alkylating agent
Mercaptopurine	6-Mercaptopurine	Antimetabolite
	6-MP	
	Purinethol®	
Methotrexate	Amethopterin	Antimetabolite
	Folex®	
	Mexitate®	
	Trexall®	
Mitoxantrone	Novantrone®	Anthracycline antibiotic
Prednisone	Deltasone®	Corticosteroid
	Methylprednisolone	
	Prednisolone	
Procarbazine	Matulane®	Alkylating agent
	Natulan®	
Temozolomide	Temodal®	Non-classical alkylator
	Temodar®	
Teniposide	VM-26	Epipodophyllotoxin
	Vumon®	
Thioguanine	Lanvis®	Antimetabolite
	Tabloid®	
	6-Thioguanine	
	6-TG	
Thiotepa	Thioplex®	Alkylating agent
Vinblastine	VBL	Plant alkaloid
	Velban®	
	Velbe®	
Vincristine	Oncovin®	Plant alkaloid
	VCR	
	Vincasar®	
	Vincrex®	

# Radiation Fields Defined

Term	Definition
Cranial	Whole brain
Waldeyer's Ring	Oropharyngeal + nasopharyngeal (tonsils and adenoids)
Spine – cervical	Including some or all of cervical spine (C1-C7)
Spine – thoracic	Including some or all of thoracic spine (T1-T12)
Spine – lumbar	Including some or all of lumbar spine (L1-L5)
Spine – sacral	Including sacrum (S1-S5)
Mantle	Bilateral: cervical (neck), supraclavicular, mediastinal, hilar, axillary
Extended mantle	Mantle + paraaortic
Mini-mantle	Cervical (neck), supraclavicular, axillary (excludes mediastinal and lung)
Mediastinal	Includes mediastinum plus bilateral hilar
Whole abdomen	Upper abdomen and pelvis
Upper abdomen	Top of diaphragm to iliac crest (bilateral).  <i>"Any upper abdominal field" refers to any radiation field located between the top of the diaphragm and the iliac crest, including the following: hepatic, hemiabdomen/flank, upper quadrant, renal bed, spleen (partial, entire), splenic pedicle, inverted Y, and paraaortic.</i>
Flank/hemiabdomen	Top of diaphragm to iliac crest (unilateral; medial border along contralateral vertebral bodies).  <i>Note: Most hemiabdominal fields do not extend beyond the iliac crest; however, in some cases, depending on tumor location, the hemiabdominal field may have extended into the pelvis. If the hemiabdominal field extended below the iliac crest, exposure to pelvic fields should be considered in assessing the patient's risk for late sequelae.</i>
Renal	Renal bed
Paraaortic	Para-aortic lymph nodes (generally from T10 to L4 cephalad-caudad, and the transverse processes laterally) +/- spleen/splenic pedicle
Pelvic	Iliac crest to 3 cm below ischium. Includes iliac, inguinal, $\pm$ femoral lymph nodes, bladder + prostate (male) or uterus, vagina, ovaries [if not surgically relocated] (female).
Inverted Y	Paraaortic + pelvic $\pm$ spleen/splenic pedicle
Subtotal lymphoid (STLI)	Mantle + paraaortic + splenic
Total lymphoid (TLI)	Mantle + Inverted Y + spleen/splenic pedicle

# Summary of Cancer Treatment Introduction

## Importance of a Comprehensive Cancer Treatment Summary

The *Children's Oncology Group Long-Term Follow-Up Guidelines for Survivors of Childhood, Adolescent, and Young Adult Cancers* are based on therapeutic exposures received during cancer treatment. Availability of a comprehensive treatment summary, including all therapeutic agents received by the survivor, is presumed. Patients who do not have a comprehensive treatment summary should be instructed to obtain one from the institution(s) where they received their treatment. Ideally, the comprehensive treatment summary should include the following information:

- Demographics (name, sex, date of birth, contact information)
- Diagnosis, including site/stage, date, and relapse(s) if any
- Pertinent secondary diagnoses (e.g., second malignancy, Down syndrome)
- Treatment protocol information, if applicable
- All chemotherapy agents received during treatment (including route of administration for all agents, cumulative doses for alkylators, bleomycin, and anthracyclines, and designation of "high dose" versus "standard dose" for methotrexate and cytarabine). Cumulative doses for all other agents should be provided if available. *Note:* "High dose" methotrexate/cytarabine is defined as any single dose  $\geq 1000 \text{ mg/m}^2$ . "Standard dose" methotrexate/cytarabine is defined as all single doses  $< 1000 \text{ mg/m}^2$ . See section 28 of Guidelines for anthracycline isototoxic dose-equivalent conversion. For doses in mg/kg, multiply by 30 to obtain equivalent dosing in mg/m<sup>2</sup> (example: 2 mg/kg = 60 mg/m<sup>2</sup>).
- Radiation therapy summary, including field(s), laterality (if applicable), start/stop dates, number of fractions, dose per fraction, boost dose/location (if applicable), total dose (in Gy), and radiation type. *Note:* To convert cGy or rads to Gy, divide dose by 100 (example: 2400 cGy = 2400 rads = 24 Gy)
- Hematopoietic cell transplant(s), including type(s), date(s), conditioning regimen(s), and GVHD prophylaxis and/or treatment
- Surgical procedures, including date, site, and laterality if applicable
- Other therapeutic modalities (e.g., biologicals, systemic radiation)
- Significant complications/late effects with dates of onset/resolution
- Adverse drug reactions/allergies

## Minimum Information Necessary to Generate Patient-Specific Guidelines:

In order to generate accurate exposure-based follow-up recommendations from these guidelines, the following information regarding the survivor's diagnosis and treatment is required, at minimum:

- Survivor's sex
- Survivor's date of birth
- Date of cancer diagnosis
- Date cancer therapy was completed

## Summary of Cancer Treatment Introduction (cont)

- Names of all chemotherapy agents received. *Note:* For a list of chemotherapy agents addressed by these guidelines, see Chemotherapy portion of the Index (sections 6-37). For generic and brand names of chemotherapy agents, see *Chemotherapy Agents* in Appendix I.
- Cumulative dose of all anthracycline chemotherapy received (i.e., doxorubicin, daunorubicin, idarubicin, mitoxantrone and epirubicin), and age at first anthracycline dose (if unknown, age at first anthracycline dose is presumed to be age at diagnosis). *Note:* For anthracycline isotoxic dose-equivalent conversion, see Section 28 of Guidelines. For doses in mg/kg, multiply by 30 to obtain equivalent dosing in mg/m<sup>2</sup> (example: 2 mg/kg = 60 mg/m<sup>2</sup>).
- For carboplatin: Whether any dose was myeloablative (i.e., given as conditioning for HCT).
- For cytarabine and methotrexate:
  - Route of administration (i.e., IV, IM, SQ, PO, IT, IO)
  - If IV: Designation of “high dose” (any single dose  $\geq$ 1000 mg/m<sup>2</sup>) versus “standard dose” (all single doses <1000 mg/m<sup>2</sup>)
- All radiation field(s) and total radiation dose (in Gy) to each field. For chest, thoracic spine, and upper abdominal radiation, include age at first dose; if unknown, age at first dose is presumed to be age at diagnosis. *Note:* Total radiation dose to each field should include boost dose, if given. To convert cGy or rads to Gy, divide dose by 100 (example: 2400 cGy = 2400 rads = 24 Gy). For list of radiation fields addressed by these guidelines, see Radiation portion of Index (Sections 38-91). For clarification of anatomical areas included in common radiation fields, see *Radiation Fields Defined* in Appendix I.
- Whether or not the survivor underwent a hematopoietic cell transplant (HCT), and if so, whether or not the survivor developed chronic graft-versus-host disease (cGVHD).
- Names of all relevant surgical procedures. *Note:* For list of surgical procedures addressed by these guidelines, see “Surgery” portion of Index (Sections 107-132).
- Names of all other therapeutic modalities. *Note:* For list of other therapeutic modalities addressed by these guidelines, see “Other Therapeutic Modalities” portion of Index (Sections 133-36).

### Templates for Summary of Cancer Treatment

Two templates for summarizing cancer treatment are included in Appendix I (and also available in electronic format at [www.survivorshipguidelines.org](http://www.survivorshipguidelines.org)). These templates were originally developed in the COG Nursing Clinical Practice Subcommittee under the leadership of Lisa Bashore, MS, RN, CPNP, CPON® and Lori Boucher, RN, CRA. The templates were subsequently pilot tested and revised, then further refined based on feedback from the Late Effects Committee and a working group from the National Cancer Institute. The abbreviated form contains all data elements currently necessary for generation of patient-specific recommendations from the COG LTFU Guidelines, and meets the minimum data requirements for initial use of the “Passport for Care” web-based guideline interface. However, the COG Late Effects Committee recognizes that as new evidence becomes available and these guidelines are updated, additional details

## Summary of Cancer Treatment Introduction (cont)

regarding the childhood cancer survivor's therapeutic exposures may be required in order to generate comprehensive recommendations. Therefore, we strongly advise that a comprehensive treatment summary be prepared for each childhood cancer survivor when feasible, including a record of all therapeutic exposures with applicable dates, details of administration, and cumulative doses of all agents, including those not currently addressed by these guidelines.

In addition to the treatment summary templates, a "key" for completing the comprehensive version of the treatment summary is also included in Appendix I. This "key" correlates to the drop-down menus that will be available in the web-based "Passport for Care" guideline interface.

## **SUMMARY OF CANCER TREATMENT (Abbreviated)**

# **SUMMARY OF CANCER TREATMENT (Comprehensive)**

<b>DEMOGRAPHICS</b>			
Name: (last, first, middle)	Sex: (M/F)	Date of Birth:	COG Reg #:

# KEY FOR COMPLETING SUMMARY OF CANCER TREATMENT (Comprehensive Version)

## #1: Race/Ethnicity

Asian
Black
Caucasian (non-Hispanic)
Hispanic
Native American/Alaskan Native
Native Hawaiian/Pacific Islander
Multi-racial/multi-ethnic
Other (specify): _____

## #2: Cancer Diagnosis

<b>Central Nervous System Tumor</b>
Astrocytoma
Cerebellar astrocytoma
Supratentorial astrocytoma
Brainstem glioma
Choroid plexus neoplasm
Craniopharyngioma
Ependymoma
Germ cell tumor, intracranial, specify type: _____
Optic glioma
Pineal tumor
PNET
Cerebellar (medulloblastoma)
Supratentorial PNET
Spinal cord tumor, intramedullary
CNS tumor, other, specify: _____
<b>Endocrine tumor</b>
Adrenal tumor (non-neuroblastoma)
Thyroid tumor
Parathyroid tumor
Gastroenteropancreatic tumor
Multiple endocrine neoplasia syndrome
Endocrine tumor, other, specify: _____
<b>Germ cell tumor (extracranial)</b>
Seminoma
Germinoma
Dysgerminoma
Non-seminomas
Yolk sac tumor
Embryonal carcinoma
Choriocarcinoma
Teratoma
Mature
Immature
With malignant transformation
Germ cell tumor, other, specify: _____

## #2: Cancer Diagnosis (continued)

<b>Leukemia</b>
Acute lymphoblastic leukemia
Acute myeloid leukemia
Chronic myeloid leukemia
Myelodysplastic syndrome
Myeloproliferative disorder
Leukemia, other, specify: _____
<b>Liver tumor</b>
Hepatoblastoma
Hepatocellular carcinoma
Liver tumor, other, specify: _____
<b>Lymphoma</b>
Hodgkin lymphoma
Non-Hodgkin lymphoma
Lymphoblastic lymphoma
Burkitt's lymphoma
Large cell lymphoma
Anaplastic large cell lymphoma
Diffuse large B-cell lymphoma
Lymphoma, other, specify: _____
<b>Nasopharyngeal carcinoma</b>
<b>Neuroblastoma</b>
Ganglioneuroblastoma
<b>Renal tumor</b>
Wilms tumor
Clear cell sarcoma
Renal cell carcinoma
Renal tumor, other:
<b>Retinoblastoma</b>
<b>Sarcoma</b>
Ewing's sarcoma/peripheral PNET
Osteosarcoma
Rhabdomyosarcoma
Soft tissue sarcoma (nonrhabdomyosarcomatous)
Alveolar soft part sarcoma
Fibrosarcoma
Leiomyosarcoma
Liposarcoma
Malignant fibrous histiocytoma
Malignant peripheral nerve sheath tumor
Neurofibrosarcoma
Synovial sarcoma
Undifferentiated sarcoma
Sarcoma, other, specify: _____
<b>Skin cancer</b>
Basal cell carcinoma
Malignant melanoma
Squamous cell carcinoma
Skin cancer, other, specify: _____
<b>Malignancy, other, specify:</b>
<b>Langerhans cell histiocytosis</b>
<b>Diagnosis, other, specify:</b>
<b>Unknown</b>

### #3: Hereditary/Congenital History

Congenital heart disease
Congenital disease, other, specify:
Hemihypertrophy
Neurofibromatosis
Type I
Type II
Down syndrome
Syndrome, other, specify:
Heredity condition, other, specify:
None
Unknown

### #4: Subsequent Malignancy Diagnosis

Leukemia
Acute lymphoblastic leukemia
Acute myeloid leukemia
Chronic myeloid leukemia
Myelodysplastic syndrome
Myeloproliferative disorder
Leukemia, other, specify:
Lymphoma
Hodgkin lymphoma
Non-Hodgkin lymphoma
Lymphoblastic lymphoma
Burkitt's lymphoma
Large cell lymphoma
Post-transplant lymphoproliferative disorder (PTLD)
Lymphoma, other, specify:
Sarcoma
Ewing's sarcoma/peripheral PNET
Osteosarcoma
Rhabdomyosarcoma
Soft tissue sarcoma (nonrhabdomyosarcomatous)
Undifferentiated sarcoma
Other sarcoma, specify:
Thyroid cancer
Skin cancer
Basal cell carcinoma
Malignant melanoma
Squamous cell carcinoma
Breast cancer
Central nervous system tumor
Malignant, specify type and location:
Meningioma, specify location:
Other CNS tumor, specify type:
Gastrointestinal cancer
Esophageal cancer
Stomach cancer
Colorectal cancer
Hepatocellular carcinoma
Pancreatic cancer
Other GI cancer, specify:

#### #4: Subsequent Malignancy Diagnosis (continued)

Lung cancer
Bladder cancer
Renal cancer
Renal cell carcinoma
Clear cell sarcoma
Other renal cancer, specify: _____
Cervical cancer
Peripheral nerve sheath tumor/Schwannoma
Malignancy, other, specify:
None
Unknown

#### #5: Chemotherapy

Asparaginase
Bleomycin
Busulfan
Carboplatin
Myeloablative dose? <input type="checkbox"/> Yes <input type="checkbox"/> No
Carmustine (BCNU)
Chlorambucil
Cisplatin
Cladribine
Clofarabine
Cyclophosphamide
Cytarabine
If IV: Any single dose $\geq 1000 \text{ mg/m}^2$ ? <input type="checkbox"/> Yes <input type="checkbox"/> No
Dacarbazine (DTIC)
Dactinomycin
Daunorubicin
Dexamethasone
Docetaxel
Doxorubicin
Epirubicin
Etoposide (VP-16)
Fludarabine
Fluorouracil
Gemcitabine
Hydrocortisone
Hydroxyurea
Idarubicin
Ifosfamide
Imatinib Mesylate
Irinotecan
Lomustine (CCNU)
Mechlorethamine
Melphalan
Mercaptopurine
Methotrexate
If IV: Any single dose $> 1000 \text{ mg/m}^2$ ? <input type="checkbox"/> Yes <input type="checkbox"/> No
Mitoxantrone
Oxaliplatin
Paclitaxel
Prednisone

## #5: Chemotherapy (continued)

Procarbazine
Temozolomide
Teniposide (VM-26)
Thioguanine (6-TG)
Thiotepa
Topotecan
Trimetrexate
Vinorelbine
Vinblastine
Vincristine
Other, specify:
None
Unknown

## #6: Route

PO
IM
IV
SQ
IT
IO
Other, specify:
Unknown

## #7: Cumulative Dose (Note: this is a required field for anthracyclines and optional but suggested for all others)

mg/m <sup>2</sup>
units/m <sup>2</sup>
mg/kg <small>(Note: computer will multiply mg by 30 and display as mg/m<sup>2</sup>)</small>
Not available
Not applicable
Other, specify:
Unknown

## #8: Radiation Site/Field

<b>Head/brain</b>
Cranial
Craniospinal <small>(Note: if selected, computer will prompt user to enter data for both cranial and spinal fields)</small>
Orbital/eye, specify: Right, left, bilateral
Ear/infratemporal, specify: Right, left, bilateral
Nasopharyngeal
Oropharyngeal
Waldeyer's Ring
Other head/brain radiation, specify: _____
<b>Neck</b>
Cervical (neck), specify: Right, left, bilateral
SuprACLAVICULAR, specify: Right, left, bilateral
<b>Spine</b>
Spine - cervical
Spine - thoracic
Spine - lumbar
Spine - sacral

## #8: Radiation Site/Field (continued)

<b>Chest (thorax)</b>
Lung (whole), specify: Right, left, bilateral
Mantle
Mini-Mantle
Extended Mantle
Mediastinal
Hilar
Axilla, specify: Right, left, bilateral
Chest, other, specify: _____
<b>Abdomen</b>
Whole abdomen
Upper abdomen, specify field(s) if applicable:
Hepatic
Hemabiadomel/flank, specify: Right, left
Upper quadrant, specify: Right, left, bilateral
Renal bed, specify: Right, left, bilateral
Spleen, specify: partial, entire
Splenic pedicle
Inverted Y
Paraaoortic
<b>Pelvis</b>
Pelvic
Vagina
Prostate
Bladder
Iliac
Inguinal
Femoral
Inverted Y
Testicular, specify: Right, left, bilateral
<b>Skeletal</b>
<b>Extremity</b>
Upper, specify: Right, left, bilateral; specify: proximal, distal, entire
Lower, specify: Right, left, bilateral; specify: proximal, distal, entire
<b>Bone</b> , specify:
Other, specify:
<b>Total Body Irradiation (TBI)</b>
<b>Total Lymphoid Irradiation (TLI)</b>
<b>Subtotal Lymphoid Irradiation (STLI)</b>
<b>Other</b> , specify:
Add comment:
<b>None</b>
<b>Unknown</b>

## #9: Radiation Boost

Tumor bed, specify location:
Other location, specify:
None
Unknown
Add comment:

**#10: Radiation Type**

Brachytherapy
Conformal
External beam (conventional)
IMRT
Stereotactic
Other, specify:
None
Unknown

**#11: Hematopoietic Cell Transplant - Type**

Autologous
Matched related
Mismatched related
Haploididentical related
Syngeneic
Matched unrelated
Other, specify:
None
Unknown

**#12: Hematopoietic Cell Transplant - Source**

Bone marrow
Peripheral blood stem cells
Cord blood
Other, specify:
None
Unknown

**#13: Hematopoietic Cell Transplant - Conditioning Regimen**

ATG
Busulfan
Carmustine (BCNU)
Cyclophosphamide
Etoposide
Fludarabine
Melphalan
Thiotepa
TBI
Other, specify:
None
Unknown

**#14: GVHD Prophylaxis/Treatment**

ATG
Cyclosporine
Methotrexate
MMF (mycophenolate mofetil)
Prednisone
PUVA
Sirolimus
Tacrolimus
Other, specify:
None
Unknown

## #15: Surgery

Amputation, specify: Right, left, bilateral; specify site:

Central venous catheter

Cystectomy

Enucleation specify: Right, left, bilateral

Laparotomy

Limb sparing procedure, specify: Right, left, bilateral; specify site:

Nephrectomy, specify: Right, left, bilateral

Neurosurgery - brain

Craniotomy

Ventriculoperitoneal shunt

Other, specify:

Neurosurgery - spinal

Laminectomy

Other, specify:

Orchiectomy, specify: Right, left, bilateral

Pelvic surgery

Hysterectomy

Oophoropexy

Oophorectomy, specify: Right, left, bilateral

Pelvic surgery, other, specify:

Pulmonary lobectomy, specify site:

Pulmonary wedge resection, specify site:

Pulmonary metastasectomy, specify site:

Splenectomy

Thyroidectomy

Other, specify:

None

Unknown

## #16: Other Therapeutic Modalities

**Systemic Radiation**

Radioiodine therapy (I-131 thyroid ablation)

Systemic MIBG (in therapeutic doses)

Other, specify:

**Bioimmunotherapy**

Hematopoietic growth factors:

G-CSF

Erythropoietin

Thrombopoietin

Interferon:

Alpha interferon

Gamma interferon

Interleukin:

IL-2

IL-11

Other, specify:

Monoclonal antibody, specify type:

Retinoic acid, specify type:

Other, specify:

**Other therapeutic modality, specify:**

None

Unknown

## #17: Complications/Late Effects (by system)

<b>Psychosocial</b>
Behavioral problems/behavioral change
Educational problems
Fatigue
Limitations in healthcare access and/or insurance
Psychosocial disability due to pain
Anxiety
Depression
Post-traumatic stress
Psychosocial disability due to pain
Social withdrawal
Risky behaviors
Tobacco use
Alcohol abuse
Substance abuse
Other, specify:
Psychosocial maladjustment
Impaired quality of life
Psychosocial complication, other, specify:
<b>Ocular</b>
Cataract
Enophthalmos
Orbital hypoplasia
Glaucoma
Keratitis
Xerophthalmia (keratoconjunctivitis sicca)
Lacrimal duct atrophy
Optic chiasm neuropathy
Retinopathy
Telangiectasia
Maculopathy
Papillopathy
Chronic painful eye
Visual impairment (uncorrectable)
Ocular nerve palsy
Gaze paresis
Nystagmus
Papilledema
Optic atrophy
Ocular complication, other, specify:
<b>Auditory</b>
Eustachian tube dysfunction
Hearing loss (requires hearing aids? <input type="checkbox"/> Yes <input type="checkbox"/> No)
Sensorineural hearing loss
Conductive hearing loss
Otosclerosis
Tinnitus
Tympanosclerosis
Vertigo
Auditory complication, other, specify:
<b>Dental</b>
Dental abnormalities
Enamel dysplasia
Root thinning/shortening

## #17: Complications/Late Effects (by system, continued)

Tooth/root agenesis
Microdontia
Periodontal disease
Tooth decay
Malocclusion
Xerostomia (salivary gland dysfunction)
Osteoradionecrosis
Temporomandibular joint dysfunction
Dental complication, other, specify:
<b>Cardiovascular</b>
Arrhythmia
Atherosclerotic heart disease
Cardiomyopathy
Congestive heart failure
Myocardial infarction
Pericardial fibrosis
Pericarditis
Subclinical left ventricular dysfunction
Valvular disease
Carotid artery disease
Subclavian artery disease
Thrombosis/vascular insufficiency (related to central line)
Vasospastic attacks (Raynaud's phenomenon)
Cardiovascular complication, other, specify:
<b>Pulmonary</b>
Bronchiolitis obliterans
Interstitial pneumonitis
Pulmonary fibrosis
Pulmonary dysfunction
Acute respiratory distress syndrome (ARDS)
Obstructive lung disease
Restrictive lung disease
Chronic bronchitis
Bronchiectasis
Pulmonary complication, other, specify:
<b>Gastrointestinal/Hepatic</b>
Abdominal adhesions
Bowel obstruction
Bowel strictures
Fecal incontinence
Cholelithiasis
Cholecystitis
Chronic enterocolitis
Esophageal stricture
Fistula
Malabsorption
Nutritional deficiency
Vitamin B12, folate or carotene deficiency
Cirrhosis
Hepatic fibrosis
Hepatic dysfunction
Chronic hepatitis (non-infectious)
Iron overload
Venocclusive disease (VOD) of the liver
Gastrointestinal/hepatic complication, other, specify:

## #17: Complications/Late Effects (by system, continued)

<b>Endocrine/Metabolic</b>
Hypothyroidism
Primary hypothyroidism (thyroid gland failure)
Secondary (central) hypothyroidism (TR/TSH deficiency)
Hyperthyroidism
Thyroid nodule
Precocious puberty
Gonadal dysfunction/failure
Gonadotropin deficiency (LH/FSH deficiency) [central gonadal failure]
Gonadal dysfunction – testicular: See Reproductive (male)
Gonadal dysfunction – ovarian: See Reproductive (female)
Metabolic syndrome
Overweight (Age 2-20 yrs: BMI for age >85 - <95%ile; Age >20 yrs: BMI 25 to 29.9)
Obesity (Age 2-20 yrs: BMI for age >95%ile; Age >20 yrs, BMI >30)
Underweight (FTT)
Insulin resistance
Impaired glucose tolerance
Diabetes mellitus
Type I
Type II
Gestational
Dyslipidemia
Adrenal insufficiency
Primary adrenal insufficiency (adrenal gland failure)
Secondary (central) adrenal insufficiency (ACTH deficiency)
Hyperprolactinemia
Growth deceleration
Growth hormone deficiency
Short stature (<5 <sup>th</sup> percentile)
Endocrine/metabolic complication, other, specify:
<b>Musculoskeletal</b>
Amputation, specify type and site:
Osteonecrosis (avascular necrosis – AVN), specify site:
Craniofacial abnormalities
Impaired cosmesis
Contractures
Functional and activity limitation, specify:
Hypoplasia, specify site:
Kyphosis
Limb length discrepancy
Limb salvage, specify type and site:
Osteopenia
Osteoporosis
Phantom pain
Prosthesis, malfunction (poor fit, loosening, non-union, fracture)
Prosthesis, revision required due to growth
Residual limb integrity problems
Fracture (radiation-induced)
Increased energy expenditure (related to amputation/limb salvage)
Fibrosis (musculoskeletal)
Scoliosis
Short stature
Shortened trunk height
Reduced/uneven growth
Musculoskeletal complication, other, specify:

## #17: Complications/Late Effects (by system, continued)

<b>Central Nervous System (CNS)</b>
Clinical leukoencephalopathy
With imaging abnormalities
Without imaging abnormalities
Learning disorder/disability
Math
Reading
Other, specify:
Motor deficit
Neurocognitive deficit, specify:
Diminished IQ
Executive function (planning/organization)
Sustained attention
Memory
Processing speed
Visual-motor integration
Moyamoya
Ataxia
Movement disorder
Neurogenic bladder
Neurogenic bowel
Paralysis
Occlusive cerebral vasculopathy
Seizures
Stroke
CNS complication, other, specify:
<b>Peripheral Nervous System (PNS)</b>
Peripheral sensory neuropathy
Peripheral motor neuropathy
PNS complication, other, specify:
<b>Urinary</b>
Hydronephrosis, specify: Right, left, bilateral
Hypertension
Mononephric
Renal insufficiency
Renal glomerular disorder
Hyperfiltration
Renal tubular disorder
Hypophosphatemic rickets
Renal Fanconi syndrome
Renal tubular acidosis
Vesicoureteral reflux
Bladder fibrosis
Urinary incontinence
Reservoir calculi
Dysfunctional voiding
Hemorrhagic cystitis
Proteinuria
Chronic UTI
Neobladder perforation
Urinary tract obstruction (due to retroperitoneal fibrosis)
Stricture, urinary tract, specify:
Urinary complication, other, specify:

## #17: Complications/Late Effects (by system, continued)

<b>Reproductive - Female</b>
Breast tissue hypoplasia
Uterine vascular insufficiency
Adverse pregnancy outcome
Pregnancy complications
Delivery complications
Fetal malposition
Low birthweight infant
Spontaneous abortion
Premature labor
Neonatal death
Gonadal dysfunction - ovarian
Primary ovarian failure
Delayed/arrested puberty
Premature menopause
Infertility
Inability to conceive (despite normal ovarian function)
Dyspareunia
Symptomatic ovarian cysts
Pelvic adhesions
Sexual dysfunction
Vaginal stenosis/fibrosis
<b>Reproductive - Male</b>
Gonadal dysfunction - testicular
Germ cell failure
Azoospermia
Oligospermia
Infertility
Leydig cell failure
Hypogonadism (testosterone deficiency)
Delayed/arrested puberty
Sexual dysfunction - male
Erectile dysfunction
Anejaculation
Retrograde ejaculation
Hydrocele
<b>Dermatologic</b>
Alopecia (permanent)
Dysplastic nevi
Altered skin pigmentation
Skin fibrosis
Nail dysplasia
Scleroderma
Telangiectasia
Vitiligo
<b>Immune</b>
Asplenia
Functional asplenia
Surgical asplenia
History of life-threatening infection related to asplenia
Chronic sinusitis
Chronic graft versus host disease (GVHD)
Chronic Hepatitis B
Chronic Hepatitis C

**#17: Complications/Late Effects (by system, continued)**

Chronic infection, specify:
Human immunodeficiency virus (HIV) infection
Hypogammaglobulinemia
Secretory IgA deficiency
<b>Pain, chronic</b>
Musculoskeletal
Neuropathic
Other, specify:
<b>Other, specify</b>
<b>No late effects identified</b>
<b>Unknown</b>

Children's Oncology Group

## Long-Term Follow-Up Guidelines

for Survivors of Childhood, Adolescent,  
and Young Adult Cancers  
Version 2.0 – March 2006

## Tools for Guideline Application

Copyright 2006 © Children's Oncology Group  
All rights reserved worldwide

Name:	Sex: M/F	Date of Birth:
Cancer Diagnosis: _____  <input checked="" type="checkbox"/> <b>Sections 1 &amp; 2 applicable to all patients</b>	Date of Diagnosis: _____  Prior to 1972: <input type="checkbox"/> <b>Section 3</b> Prior to 1993: <input type="checkbox"/> <b>Section 4</b> 1977 - 1985: <input type="checkbox"/> <b>Section 5</b>	End Therapy Date: _____  <b>LTFU guidelines are applicable to patients who are <math>\geq 2</math> years following completion of cancer therapy</b>
<b>CHEMOTHERAPY:</b> <input type="checkbox"/> Yes <input type="checkbox"/> No If yes: <input checked="" type="checkbox"/> <b>Section 6</b> and applicable guidelines for specific chemotherapy agents below		
Chemotherapy Agent (✓ if patient received) ↓	Applicable guideline sections	
Asparaginase	<b>Section 34</b>	
Bleomycin	<b>Section 29</b>	
Busulfan	<b>Sections 7M/F, 8, 9, 10</b>	
Carboplatin – all doses	<b>Sections 7M/F, 8, 15, 16, 17</b>	
– myeloablative dose	See also: <b>Section 14</b> Note: Myeloablative dose = conditioning for HCT	
Carmustine	<b>Sections 7M/F, 8, 9</b>	
Chlorambucil	<b>Sections 7M/F, 8</b>	
Cisplatin	<b>Sections 7M/F, 8, 14, 15, 16, 17</b>	
Cyclophosphamide	<b>Sections 7M/F, 8, 11, 12</b>	
Cytarabine: SQ, IT, IO, low-dose IV	<b>Section 20</b> Note: Low-dose IV = all single doses $< 1000 \text{ mg/m}^2$	
Cytarabine: High-dose IV	<b>Sections 18, 19</b> Note: High-dose IV = any single dose $\geq 1000 \text{ mg/m}^2$	
Dacarbazine	<b>Sections 7M/F, 8</b>	
Dactinomycin	<b>Section 30</b>	
Daunorubicin Cumulative dose: _____ mg/m <sup>2</sup> Age at first dose: _____	<b>Sections 27, 28</b>	
Dexamethasone	<b>Sections 31, 32, 33</b>	
Doxorubicin Cumulative dose: _____ mg/m <sup>2</sup> Age at first dose: _____	<b>Sections 27, 28</b>	
Epirubicin* Cumulative dose: _____ mg/m <sup>2</sup> Age at first dose: _____	<b>Sections 27, 28</b> Cumulative dose $\times 0.67 =$ _____ mg/m <sup>2</sup> = doxorubicin/daunorubicin isotoxic dose	
Etoposide (VP-16)	<b>Section 37</b>	
Idarubicin* Cumulative dose: _____ mg/m <sup>2</sup> Age at first dose: _____	<b>Sections 27, 28</b> Cumulative dose $\times 5 =$ _____ mg/m <sup>2</sup> = doxorubicin/daunorubicin isotoxic dose	
Ifosfamide	<b>Sections 7M/F, 8, 11, 13</b>	
Lomustine	<b>Sections 7M/F, 8, 9</b>	
Mechlorethamine	<b>Sections 7M/F, 8</b>	
Melphalan	<b>Sections 7M/F, 8</b>	
Mercaptopurine (6-MP)	<b>Section 21</b>	

\*Use formulas below to convert to doxorubicin/daunorubicin isotoxic equivalents prior to calculating total cumulative anthracycline dose:

**Epirubicin** - multiply total dose  $\times 0.67$     **Idarubicin** - multiply total dose  $\times 5$     **Mitoxantrone** - multiply total dose  $\times 3.5$

**Note:** There is a paucity of literature to support isotoxic dose conversion; however, the above conversion factors may be used for convenience in order to gauge screening frequency. Clinical judgment should ultimately be used to determine indicated screening for individual patients.

Chemotherapy Agent (con't) (✓ if patient received) ↓	Applicable guideline sections
Methotrexate: PO, IM, low and high-dose IV	<b>Sections 22, 23, 24</b>
Methotrexate: High-dose IV, IT, IO	<b>Sections 25, 26</b>  Note: High-dose IV = any single dose $\geq 1000 \text{ mg/m}^2$
Mitoxantrone* (see footnote on previous page) Cumulative dose: _____ mg/m <sup>2</sup> Age at first dose: _____	<b>Sections 27, 28</b> Cumulative dose $\times 3.5 =$ _____ mg/m <sup>2</sup> = doxorubicin/daunorubicin isotoxic dose
Prednisone	<b>Sections 31, 32, 33</b>
Procarbazine	<b>Sections 7M/F, 8</b>
Temozolomide	<b>Sections 7M/F, 8</b>
Teniposide (VM-26)	<b>Section 37</b>
Thioguanine (6-TG)	<b>Section 21</b>
Thiotepa	<b>Sections 7M/F, 8</b>
Vinblastine	<b>Sections 35, 36</b>
Vincristine	<b>Sections 35, 36</b>

Total anthracycline cumulative dose (doxorubicin/daunorubicin isotoxic equivalent) = \_\_\_\_\_ mg/m<sup>2</sup>  
*(Instructions: Add all anthracycline doses from boxes in above table to obtain total cumulative dose)*  
*Note: For doses in mg/kg, multiply by 30 to obtain equivalent dosing in mg/m<sup>2</sup>*

RADIATION: Yes No If yes: <input checked="" type="checkbox"/> <b>Sections 38 &amp; 39</b> and applicable guidelines for specific fields below (Note: See instructions at end of this form)	Applicable guideline sections
Radiation by field <sup>†</sup> (✓ all that apply) ↓	Applicable guideline sections
Total body irradiation (TBI)	Any dose
	<b>Sections 42, 43, 49, 50, 56, 60, 62, 63, 64, 69F, 70, 79, 83F, 84F, 86M</b>
Any radiation except TBI	Any dose
	<b>Sections 40, 41</b>
Cranial	Any dose
	<b>Sections 42, 43, 44, 46, 47, 48, 49, 50, 51, 56, 59, 60, 62, 63, 64</b>
	<b>Sections 57, 58</b>
Orbital/Eye	Any dose
	<b>Sections 42, 46, 47, 48, 49, 50, 51, 56</b>
	<b>Section 57</b>
Ear/Infratemporal	Any dose
	<b>Sections 45, 52, 53, 54, 55, 61, 65, 66</b>
	<b>Sections 42, 43, 46, 47, 48, 49, 50, 51</b>
Nasopharyngeal	Any dose
	<b>Section 58</b>
	<b>Sections 45, 52, 53, 54, 55</b>
Oropharyngeal	Any dose
	<b>Sections 42, 46, 47, 48, 49, 50, 51, 59, 60, 62, 63, 64</b>
	<b>Section 61, 65, 66</b>
Spine (cervical)	Any dose
	<b>Sections 59, 60, 62, 63, 64</b>
	<b>Section 88</b>
	<b>Section 73</b>
	<b>Sections 61, 65, 66, 67, 91</b>

<sup>†</sup> Note: Total dose to each field should include boost dose, if given

Radiation by field <sup>†</sup> con't (✓ all that apply) ↓		Applicable guideline sections
Spine (thoracic) Age at time of XRT: _____	Any dose	<b>Section 71</b>
	≥ 12 Gy	<b>Sections 88, 89</b>
	≥ 30 Gy	<b>Sections 73, 76, 77, 78, 90</b>
	≥ 40 Gy	<b>Section 91</b>
Spine (lumbar)	≥ 12 Gy	<b>Sections 88, 89</b>
	≥ 25 Gy	<b>Sections 83F, 84F</b>
	≥ 30 Gy	<b>Sections 76, 77, 78</b>
	≥ 40 Gy	<b>Section 91</b>
Spine (sacral)	≥ 12 Gy	<b>Sections 88, 89</b>
	≥ 25 Gy	<b>Sections 83F, 84F</b>
	≥ 30 Gy	<b>Sections 76, 77, 78, 80, 81, 82</b>
	≥ 40 Gy	<b>Section 91</b>
Cervical (neck)	Any dose	<b>Sections 59, 60, 62, 63, 64, 88</b>
	≥ 30 Gy	<b>Section 73</b>
	≥ 40 Gy	<b>Sections 61, 65, 66, 67, 91</b>
Supraclavicular	Any dose	<b>Sections 59, 60, 62, 63, 64, 88</b>
	≥ 30 Gy	<b>Section 73</b>
	≥ 40 Gy	<b>Sections 61, 65, 66, 67, 91</b>
Mantle Age at time of XRT: _____	Any dose	<b>Sections 59, 60, 62, 63, 64, 69F, 70, 71, 88, 89, 90</b>
	≥ 20 Gy	<b>Section 68F</b>
	≥ 30 Gy	<b>Section 73</b>
	≥ 40 Gy	<b>Sections 61, 65, 66, 67, 91</b>
Mini-Mantle	Any dose	<b>Sections 59, 60, 62, 63, 64, 69F, 88, 89, 90</b>
	≥ 20 Gy	<b>Section 68F</b>
	≥ 30 Gy	<b>Section 73</b>
	≥ 40 Gy	<b>Sections 61, 65, 66, 67, 91</b>
Mediastinal Age at time of XRT: _____	Any dose	<b>Section 69F, 70, 71, 88, 89, 90</b>
	≥ 20 Gy	<b>Section 68F</b>
	≥ 30 Gy	<b>Section 73</b>
	≥ 40 Gy	<b>Section 91</b>
Chest (thorax) Age at time of XRT: _____	Any dose	<b>Sections 69F, 70, 71, 88, 89, 90</b>
	≥ 20 Gy	<b>Section 68F</b>
	≥ 30 Gy	<b>Section 73</b>
	≥ 40 Gy	<b>Section 91</b>
Axilla Age at time of XRT: _____	Any dose	<b>Sections 69F, 71, 88</b>
	≥ 20 Gy	<b>Section 68F</b>
	≥ 40 Gy	<b>Section 91</b>
Whole lung	Any dose	<b>Sections 69F, 70, 88, 89, 90</b>
Whole abdomen Age at time of XRT: _____	Any dose	<b>Sections 71, 79, 82, 83F, 84F, 88, 89, 90</b>
	≥ 30 Gy	<b>Sections 73, 74, 75, 76, 77, 78, 80, 81</b>
	≥ 40 Gy	<b>Sections 72, 91</b>

<sup>†</sup> Note: Total dose to each field should include boost dose, if given

Radiation by field <sup>†</sup> con't (✓ all that apply) ↓		Applicable guideline sections
Any upper abdominal field* Age at time of XRT: _____	Any dose	Sections 71, 79 (except paraaortic), 88, 89, 90
	≥ 30 Gy	Sections 73, 74, 75, 76, 77, 78
	≥ 40 Gy	Section 91
Spleen (entire)	≥ 40 Gy	See also: Section 72
Left upper quadrant	≥ 40 Gy	See also: Section 72
Inverted Y	≥ 40 Gy	See also: Section 72
Any pelvic field**	Any dose	Sections 82, 83F (except iliac/inguinal), 84F, 85F, 86M, 88, 89
	≥ 20 Gy	Section 87M
	≥ 30 Gy	Sections 76, 77, 78, 80, 81
	≥ 40 Gy	Section 91
Testicular	Any dose	Section 86M
	≥ 20 Gy	Section 87M
Extremity	Any dose	Section 88
	≥ 40 Gy	Section 91

<sup>†</sup> Note: Total dose to each field should include boost dose, if given

\*Upper abdominal fields include: Hepatic, hemiabdomen/flank, upper quadrant, renal bed, spleen (partial, entire), splenic pedicle, inverted Y, and paraaortic.

\*\*Pelvic fields include: Pelvic, vaginal, prostate, bladder, iliac, inguinal, femoral and inverted Y; hemiabdominal included only if field extended below iliac crest

HEMATOPOIETIC CELL TRANSPLANT: Yes    No    If yes: <input checked="" type="checkbox"/> Sections 92-97
If yes, did patient develop chronic graft-versus-host disease (cGVHD)? Yes    No    If yes: <input checked="" type="checkbox"/> Sections 98-106 (103 – active cGVHD; 105F - females)

SURGERY: Yes    No    If yes, include applicable guideline sections below:	
Surgical procedure (✓ if patient received) ↓	Applicable guideline sections
Amputation	Section 107
Central venous catheter	Section 108
Cystectomy	Sections 109, 126, 127, 128M/F, 129M
Enucleation	Section 110
Hysterectomy	Section 111F (see also oophorectomy, if applicable, section 123F or 124F)
Laparotomy	Section 112
Limb sparing procedure	Section 113
Nephrectomy	Section 114
Neurosurgery - brain	Sections 115, 116, 117, 118
Neurosurgery - spinal cord	Sections 119, 120, 121M/F
Oophoropexy	Section 122F
Oophorectomy - unilateral	Section 123F
Oophorectomy - bilateral	Section 124F
Orchiectomy	Section 125M
Pelvic surgery	Sections 126, 127, 128M/F, 129M
Pulmonary lobectomy, metastasectomy and/or wedge resection	Section 130
Splenectomy	Section 131
Thyroidectomy	Section 132

OTHER THERAPEUTIC MODALITIES: Yes No If yes, include applicable guideline sections below:			
Other Therapeutic Modality (✓ if patient received)		Applicable guideline sections	
Radioiodine therapy (I-131 thyroid ablation)		<b>Sections 133, 134</b>	
Systemic MIBG (in therapeutic doses)		<b>Section 135</b>	
Bioimmunotherapy		<b>Section 136</b>	

CANCER SCREENING GUIDELINES			
Patient type	Cancer type	Age at first screening	Applicable guideline sections (✓ as indicated)
All patients	Colorectal	Standard risk: Age 50 years  Highest risk: XRT: Age 35 or 10 years after XRT (whichever occurs last) HNPCC: Puberty FAP: Age 21 years IBD: 8 years after diagnosis	<b>Section 139</b>
	Lung	Highest risk: At entry into LTFU	<b>Section 141</b>
	Oral	Highest risk: At entry into LTFU	<b>Section 142</b>
	Skin	Highest risk: At entry into LTFU	<b>Section 144</b>
Females	Breast	Standard risk: Age 20 years  Highest risk: At puberty	<b>Section 137F</b>
	Cervical	All females: 3 years after first vaginal intercourse, or age at 21, whichever occurs first	<b>Section 138F</b>
	Endometrial	Highest risk: Age 35 years	<b>Section 140F</b>
Males	Prostate	Males $\geq$ 45 years (see guideline)	<b>Section 143M</b>
	Testicular	N/A (see guideline)	<b>Section 145M</b>

GENERAL HEALTH SCREENING		
All patients	<input checked="" type="checkbox"/>	<b>Section 146</b>

#### Instructions for Radiation sections

If patient received radiation dose  $\geq$  minimum dose listed, select all applicable guideline sections listed for doses up to but not exceeding dose received.

Example: If patient received 35 Gy and the following options are listed: "Any dose", " $\geq$ 20 Gy", " $\geq$ 30 Gy", and " $\geq$ 40 Gy", the applicable guidelines for this patient include those listed for "Any dose", "20 Gy" and "30 Gy", but not for "40 Gy".

If patient received radiation to the indicated field, but the total dose received was less than the minimum dose listed, no guidelines from that section are applicable to the patient.

Example: If patient received 10 Gy and the following options are listed " $\geq$ 12 Gy", " $\geq$ 25 Gy", " $\geq$ 30 Gy", no guidelines in this section are applicable to this patient.
